

Roll No.: 26

Name: Manas divekar

Date: 11/08/2023

Assignment No. 3

Aim: To create a S3 bucket in AWS. Upload, download and copy objects in bucket.

Theory:

Amazon Simple Storage Service (Amazon S3) is an object storage service that offers industry-leading scalability, data availability, security, and performance. Customers of all sizes and industries can use Amazon S3 to store and protect any amount of data for a range of use cases, such as data lakes, websites, mobile applications, backup and restore, archive, enterprise applications, IoT devices, and big data analytics. Amazon S3 provides management features so that you can optimize, organize, and configure access to your data to meet your specific business, organizational, and compliance requirements.

Output:

S3 Management Console

Amazon S3

Buckets

Account snapshot

Buckets (1)

Name	AWS Region	Access	Creation date
manas.bucket	Asia Pacific (Mumbai) ap-south-1	Bucket and objects not public	August 11, 2023, 10:58:24 (UTC+05:30)

manas.bucket - S3 bucket

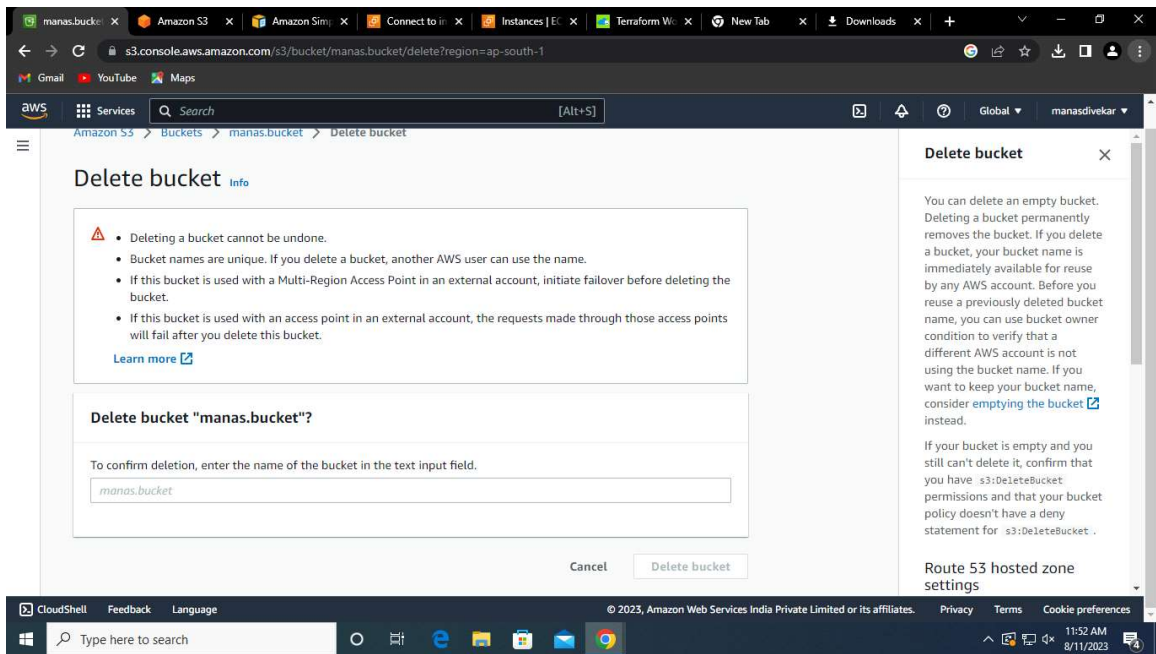

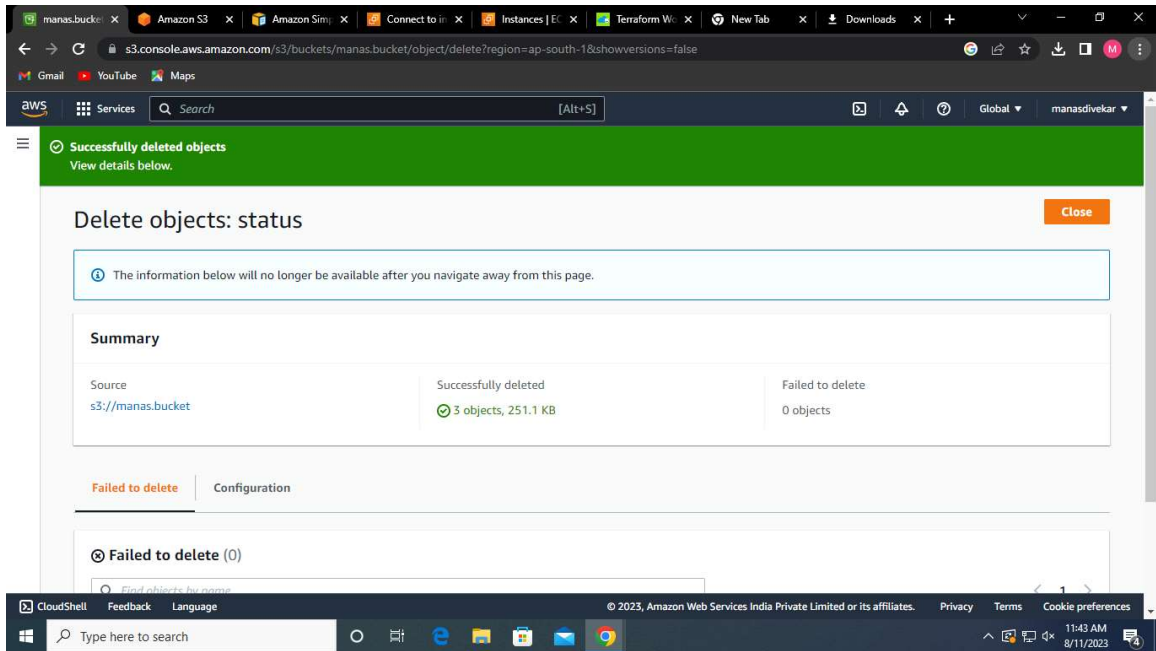

Amazon S3

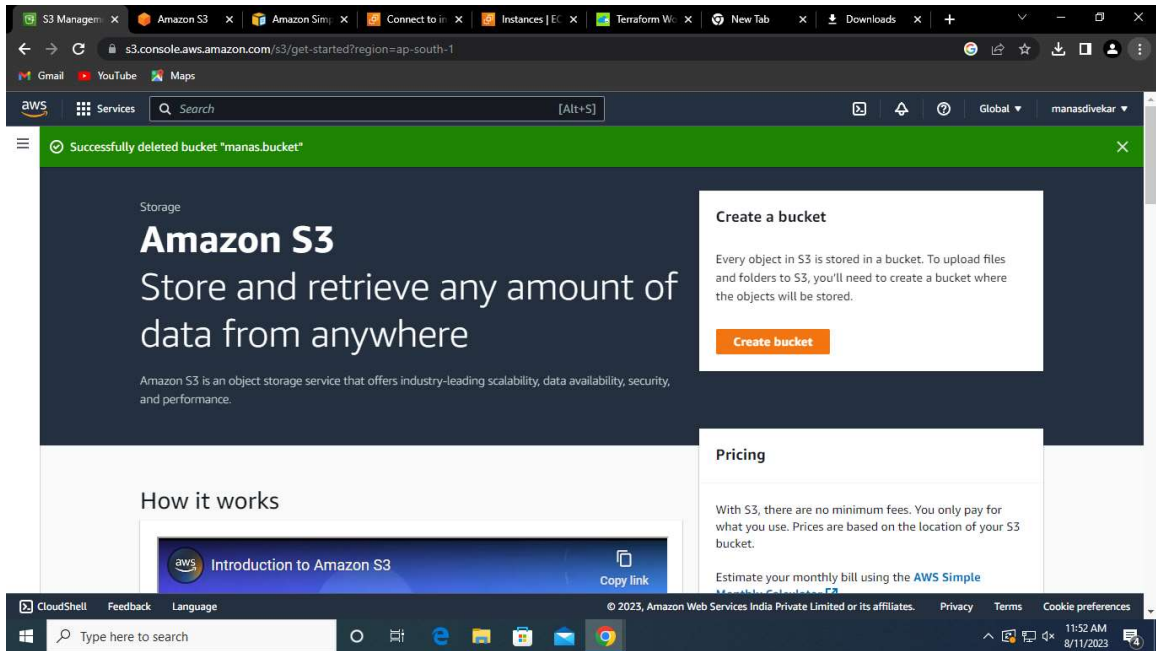

Objects

Objects (0)

No objects

You don't have any objects in this bucket.

Conclusion:

Hence learned and implemented how to create S3 bucket and uploading, downloading, copying objects in bucket.
